SONIYA C J

AI/ML Engineer | Machine Learning | Python | LLMs

Visa Status: UAE Family Visa | Immediately Available to Join

GitHub: Soniyacj21
LinkedIn: soniya-c-j

Entry-level AI/ML Engineer with 1+ years of software engineering experience and hands-on training in Machine Learning, Data Science, and Generative AI. Skilled in Python, Scikit-learn, Pandas, NumPy, SQL, data preprocessing, feature engineering, model training, predictive modeling, and model evaluation, with the ability to turn real-world datasets into working machine learning solutions. Strong software engineering foundation in REST APIs, backend services, databases, and full-stack application development (MERN, Python/Django), which supports deploying ML models into production-style applications. Familiar with Generative AI, LLMs, prompt engineering, and AWS. Seeking an entry-level AI/ML Engineer role to build and ship intelligent, data-driven products.

SKILLS

Machine Learning & AI	Scikit-learn, Supervised Learning, Predictive Modeling, Classification & Regression, Model Training, Feature Engineering, Model Evaluation, Cross-Validation, Hyperparameter Tuning, Generative AI, LLMs, Prompt Engineering
Programming & Data	Python, Pandas, NumPy, SQL, Exploratory Data Analysis (EDA), Data Cleaning & Preprocessing
Software Engineering	REST APIs, API Development, MERN Stack, Python/Django, Backend Development, Git/GitHub, Agile/Scrum
Cloud & Deployment	AWS, Scalable API Design, CI/CD, Docker (exposure), Database Optimization
Databases	SQL, MySQL, MongoDB, Structured Data Handling
Data Visualization	Power BI, DAX, Power Query, Excel, KPI Dashboards
Tools	Jupyter Notebook, VS Code, Git/GitHub

TECHNICAL EXPERIENCE

DATA SCIENCE TRAINEE **JANUARY 2026 — PRESENT**
LUMINAR TECHNOLAB *THRISSUR, KERALA*

- Built and evaluated multiple machine learning models (classification/regression) using Scikit-learn, applying cross-validation and hyperparameter tuning to improve predictive accuracy
- Cleaned and preprocessed real-world datasets using Python, Pandas, and NumPy, improving data quality and reducing downstream model errors
- Applied feature engineering techniques to boost model performance and reduce overfitting
- Conducted exploratory data analysis (EDA) to uncover patterns and trends, informing modeling decisions and translating findings into actionable business insights
- Designed interactive Power BI dashboards to communicate model results and KPIs to non-technical stakeholders

SOFTWARE ENGINEER / PickAdSpace — Advertising Ad-Tech Platform **MARCH 2025 — JANUARY 2026**
CAPSDATA TECHNOLOGIES *ERNAKULAM, KERALA*

- Developed and maintained a full-stack ad-tech platform (PickAdSpace) using React.js, Node.js, Express.js, and MongoDB
- Designed RESTful APIs integrating advertiser, campaign, and revenue-sharing modules
- Built real-time analytics dashboards for campaign performance tracking, budget utilization, and viewership metrics
- Implemented secure authentication (JWT) and role-based access for enterprise-grade data protection
- Integrated third-party APIs for data visualization (charts/graphs) and reporting features
- Collaborated in an Agile/Scrum environment with cross-functional teams; contributed to CI/CD pipeline and Git/GitHub version control workflows
- Optimized front-end performance and responsive UI using React Hooks, Redux, and Tailwind CSS

SOFTWARE ENGINEER TRAINEE / blueBriX — Healthcare Technology **FEBRUARY 2024 — AUGUST 2024**
ZH HEALTHCARE *ERNAKULAM, KERALA*

- Contributed to healthcare software modules on blueBriX's low-code/no-code EHR platform, deployed across 12,000+ providers and 2.2M+ patients
- Developed and tested RESTful APIs for EHR system integrations, ensuring seamless interoperability across healthcare data systems
- Built features supporting care coordination, patient engagement, and clinical documentation workflows using the MERN stack
- Applied healthcare data standards and HIPAA-compliant practices for secure handling of sensitive patient information
- Gained cross-functional exposure to data science workflows, DevOps (CI/CD, Docker), and mobile development through structured rotational training
- Collaborated with senior engineers on debugging, feature enhancements, and code reviews in an Agile/Scrum environment

PYTHON DJANGO INTERN **AUGUST 2023 — DECEMBER 2023**
CAMERINFOLKS *ERNAKULAM, KERALA*

- Completed full-stack development internship with focus on Python and Django backend development
- Built and integrated backend functionality for data processing and server-side logic
- Gained end-to-end experience across frontend, backend, and database layers — foundational for understanding full ML deployment pipelines

PROJECTS

MACHINE LEARNING PREDICTIVE MODELING WORKFLOW
Python, Pandas, NumPy, Scikit-learn — Data Science Training, Luminar Technolab

- Built classification and regression models in Scikit-learn on real-world datasets, covering the full workflow from data cleaning and preprocessing to feature engineering, model training, and evaluation
- Applied cross-validation and hyperparameter tuning to improve predictive accuracy, and used feature engineering to reduce overfitting
- Used exploratory data analysis (EDA) to guide modeling decisions and communicated model results through Power BI dashboards

SUPERSTORE SALES & PROFIT ANALYSIS DASHBOARD
Power BI, DAX, Power Query

- Cleaned and transformed a 9,994-row retail dataset (5,009 orders, 2014–2017) using Power Query, and built an interactive Power BI dashboard tracking Sales ($2.30M), Profit ($286K) and profit margin (12.5%)
- Created DAX measures for profit margin and year-over-year growth, with slicers for region, category, segment and year
- Found that discounts above 20% caused about $135K in losses, and that Furniture (2.5% margin) and the Tables sub-category (-$17.7K profit) were dragging overall profitability, then recommended discount caps

EDUCATION

Bachelor of Technology in Computer Engineering, *Universal Engineering College, Irinjalakuda* 2020–2023
Diploma in Computer Technology, *Women's Polytechnic College, Thrissur* 2017–2020

CERTIFICATIONS

Google — Google AI Essentials Certificate
Anthropic — AI Fluency Framework & Foundation
